

Future Me Event Case Study

RISE Programme for Year 10 with The Talent Foundry (January – March, 2025)

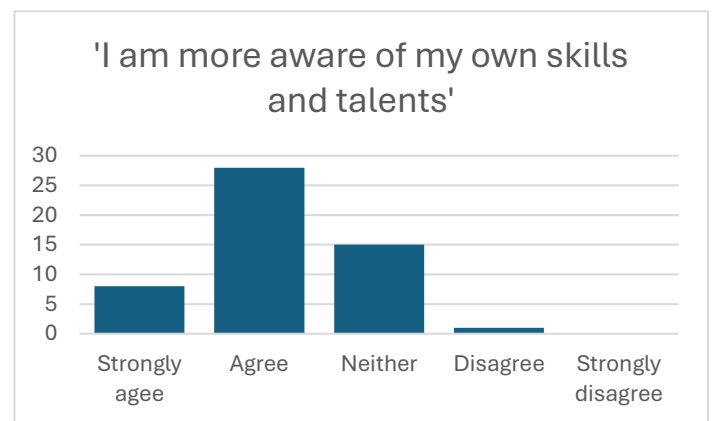

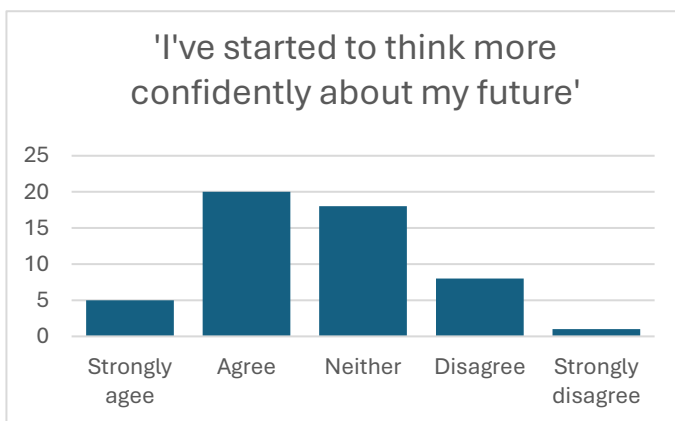

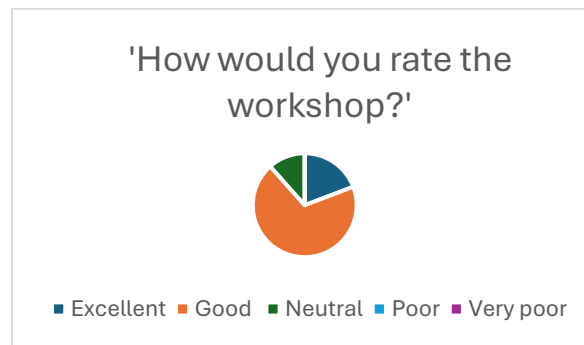

This core skills development programme focuses on showing students the skills and attributes they already have and that they can develop, within school, to release their potential. Students take part in a series of curriculum-linked challenges, supported by volunteers from RISE partner companies that:

- engage students to work collaboratively
- complete tasks that are linked to both the curriculum and future careers
- build confidence
- develop skills that are both familiar to the classroom and relevant to the workplace

Gatsby Benchmarks: 1, 2, 4 & 5

Feedback (Students)

What worked well in this encounter?

'I learnt that I was a strategist which will help me with the career I am considering.'

'I had never thought about the stuff I'm good at outside of school being important to my future.'

How could this event be even better?

'More information about specific job roles.'

'More time to do the final challenge.'
